TRAINING COURSE

"Bioinformatics Tool for Molecular Diversity Analysis"

Saudi Biological Society, King Saud University is going to organize a
one days training course on "Bioinformatics Tool for Molecular
Diversity Analysis"

16 Rajab 1438 (13 April, 2017)

TRAINING OBJECTIVES:

- ⇒ To provide basic understanding of bioinformatics tools.
- ⇒ To build computing skills by hands-on schedules on molecular data analysis.

PROGRAM DETAILS:

Day (I)

- ◆ Lecture on bioinformatics and software tools.
- ◆ Laboratory-Analysis of RAPD data.
- ◆ Laboratory-Analysis of SSR data.

WHO SHOULD ATTEND ?

Undergraduate and graduate students who have research interest
in molecular fingerprinting, biodiversity or molecular conservation
are the potential beneficiaries.
