TRAINING COURSE

"DNA Fingerprinting using Microsatellite (SSR) Markers"

Saudi Biological Society, King Saud University is going to organize a two days training course on "DNA Fingerprinting using Microsatellite (SSR) Markers"

14-15 Rajab 1438 (11-12 April, 2017)

TRAINING OBJECTIVES:

- ⇒ To provide basic understanding of molecular fingerprinting and species identification.
- ⇒ To build experimental skills by hands-on schedules on automated genetic analyzer.

PROGRAM DETAILS:

Day (1)

- ◆ Lecture on molecular fingerprinting.
- ◆ Laboratory-PCR setup for SSR markers

Day (2)

- ◆ Laboratory-Post PCR cleanup.
- ◆ Laboratory-Capillary electrophoresis.
- ◆ Laboratory-Collection of SSR data.

WHO SHOULD ATTEND ?

Undergraduate and graduate students who have research interest in molecular fingerprinting, biodiversity or molecular conservation are the potential beneficiaries.
